

I commute to work 2 hours one way to work 5 days per week and one of the things that makes my trip bearable is listening to XM Satellite Radio and its traffic and weather channels. Satellite radio provides variety and quality that are not available elsewhere. I can listen to jazz, classical, pop, 60's, 70's, sports, talk, weather with great clarity at any time. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I urge the FCC to reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that I demand and deserve.
